

SENATE COMMERCE COMMITTEE

April 30, 2019

HB 560 – Relative to Single-Use Carryout Bags

Testimony

Good afternoon, Mr. Chairman and members of the committee. My name is Paula Minnehan, Senior VP, State Government Relations with the New Hampshire Hospital Association (NHHA), representing all 26 of the state's community hospitals as well as all specialty hospitals.

The NHHA has concerns with HB 560. We have concerns with how this bill would impact hospitals. Hospitals use carry out bags both in their cafeterias as well as in their patient care areas to store patient's personal belongings. There is no exception in this bill for medical facilities. In other parts of country where these types of bills/ordnances have been passed, reasonable exceptions were considered. We question if medical facilities should be included in these types of regulations. Hospitals provide patients with plastic carryout bags to carry all the information and supplies they are provided when they leave the hospital. The medical facilities have no reasonable opportunity to completely eliminate the use of single-use carryout bags in their patient care areas at this time.

Hospitals in New Hampshire work hard to reduce the volume and toxicity of their waste. The New Hampshire Hospitals for a Healthy Environment (NH3E) was established in September 2001 in response to the ongoing interest expressed by New Hampshire's hospitals around issues such as recycling, waste minimization, environmentally preferable purchasing, mercury reduction, and other concerns related to environmental improvement and sustainability.

The group has met quarterly since 2001 and has closely collaborated with the NH Department of Environmental Services and EPA Region I to advance its efforts.

We do believe this issue deserves further research and study, so our recommendation is to incorporate this bill into HB 617, which creates a study committee to study recycling streams in New Hampshire. That bill passed the House earlier in February and was heard in Senate Energy and Natural Resources committee last month.

Thank you for the opportunity to provide our comments. I am happy to answer any questions.
